

Grant Writing for Churches

Have you ever been inspired or felt a calling to start a ministry or a program in the community your church is planted but quickly realized you did not have the money to financially support it? Has the pandemic negatively impacted your church budgets but the work in the community has become more of a necessity? Well, there is hope in times such as these!

Workshop Outline:

This 4-session online workshop will provide you with the tools you need to confidentially write for various private and government funded grants without feeling like you have “sold your soul to the devil” and give you the time you need to bring the ministry or program to life but also time to come up with a viable plan to become self-sustaining for the future. \$45/session or \$150 for all 4 sessions. After all workshop sessions have been completed, participants will have access to all sessions video and audio recording as well as course material for 60-days.
